Listing of Claims:

Claims 1-4 (Cancelled)

5. (New) A seamless glove of high support performance knitted by a flat knitting machine, wherein the seamless glove has a base knitted fabric set up knitting from a tip of finger toward a mouth and knitted in such a manner that respective fingers, a four-finger body, a five-finger body are knitted on a rib knit structure basis using a stretch elastic yarn, and wherein an elastic yarn in a tensed state is inlaid in the base knitted fabric and the inlay yarn is knotted at least at a location at which the knitting of the finger starts and at a finger crotch part, to prevent cast-off of the inlay yarn.
6. (New) The seamless glove of high support performance according to claim 5, wherein the base knitted fabric is knitted on a rib jacquard structure basis.
7. (New) The seamless glove of high support performance according to claim 5, wherein a front part and a back part of each finger are knitted to be combined with each other by rib knitting of high stitch density so that when the glove is put in a reversed state, a flat gore is formed at the finger crotch part.
8. (New) The seamless glove of high support performance according to claim 7, wherein a part of the five-finger body on the thumb side is gradually reduced toward a wrist part in knitting width by narrowing knitting.
